

CARSILOS

HORIZONTAL CEMENT SILOS

Horizontal cement silos with flexible conveyor screw for material and electronic weighing system.

Carsilos optimizes site productivity. It is available in the 15, 28 and 38 m³ versions and consists of:

- Electronic load cell weighing system, control display and process management.
- Main frame with system for positioning and release from the vehicle, without requiring the assistance of lifting machines.
- Vibration system to facilitate the flow of cement. Conveyor and discharge screw directly at the required height, with possibility of adjustment. Electronic control panel complete with the safety systems required by current European standards.
